

My Sticker Activity Book

Tractors and Trucks

With over 50 stickers,
plus fun facts, and puzzles

My Sticker Activity Book

Tractors

and

Trucks

How To Use This Book

Each double page has an introduction to Tractors and Trucks and lots of shaded areas where you can put your stickers. You'll find the stickers on sheets in the middle of this book. To help you find the correct page for your stickers, each sticker has a colored track mark beside it. Find the matching color spaces in the book. The stickers are also numbered to help you position them on the page. There are lots of extra stickers and fun activities to do, including quizzes, wordsearches, and coloring. The answers are on page 12.

p

Tractors and trucks

This is a telehandler. It has a fork attachment on an extendable arm to reach high up.

Tractors do most of the heavy work on farms. Attachments can be added to tractors to help them pull and lift massive loads. Trucks can transport all kinds of things, from tanks and cars to food and rocks. They can also have specialist equipment attached to them to dig trenches and holes.

This is an all-purpose tractor with an open driver's cab.

Tractors have large wheels with a deep tread to stop them from getting stuck in muddy fields.

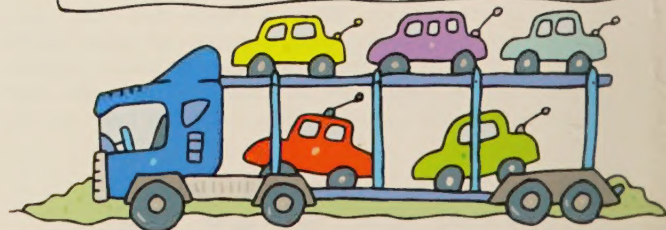

This is an all-purpose tractor with a closed driver's cab.

This backhoe loader has a scoop to lift and move rubble.

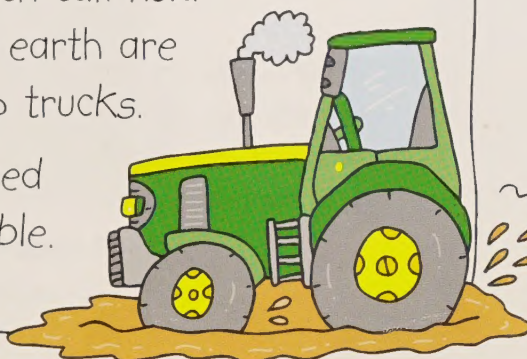

Amazing fact

A modern tractor has as much pulling power as two hundred carthorses.

Fill in the missing words to complete the sentences.

1. A _____ transports goods.
2. Heavy work on farms is done by _____.
3. Large _____ with a deep _____ prevent tractors getting stuck in muddy fields.
4. Dump trucks which can hold up to 100 tonnes of earth are called _____ dump trucks.
5. A _____ is used to lift and shift rubble.

This mega dump truck can hold up to 100 tonnes of earth.

This is an articulated tanker. The tanker can be separated from the driver's cab.

This is a one-piece truck. The body unit is permanently fixed to the driver's cab.

This car transporter has long flat trailers to secure cars on.

This monster truck is used for racing.

Farmer's helpers

The farmer works throughout the year on his land, preparing the soil, sowing seeds, and harvesting crops. Farmers rely on tractors with attachments such as plows and balers to do the heavy work. Combine

The plow attached to this tractor is turning the soil, ready for planting.

harvesters are also important pieces of equipment. They cut and gather the crop, separate the grain from its stalk, and store the grain in a large grain tank.

This No-Till drill makes holes straight into the ground and drops seeds in the holes.

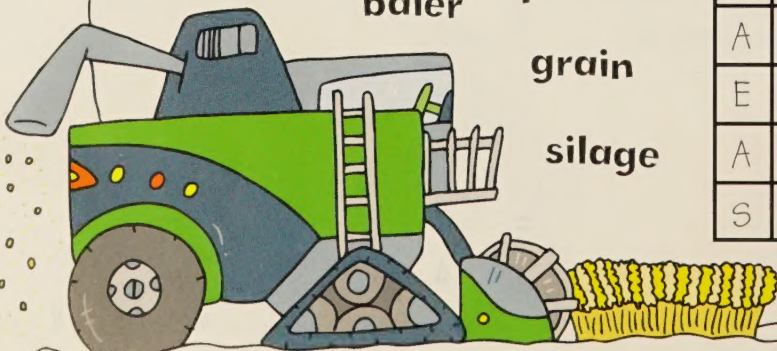

This tractor has a power harrow attached to it, which turns the soil ready for planting.

Can you find the words listed below in the wordsearch? The words run in all directions.

harvester crops
soil hay tractor
forklift baler plow
grain
silage

H	T	F	I	L	K	R	O	F	D

S	I	L	A	G	E	L	O	R	D

This crop sprayer sprays liquid on the crops to kill the insects that eat them.

Amazing fact

With the help of a tractor, a farmer can sow a 30-acre field in one day. It would take him about a week by hand.

This potato harvester is digging up potatoes and loading them into the tractor's trailer.

This forage harvester is picking up crops that have been dried in the sun to feed the animals in the winter.

This combine harvester is cutting grass to make hay.

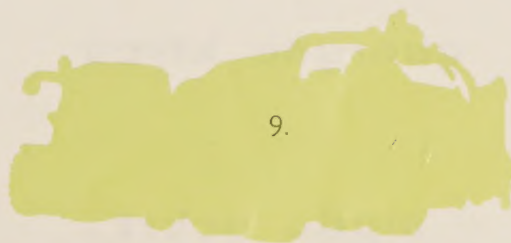

This tractor is pulling a small baler. It has a bale of fresh grass, or silage, which will feed the animals in the winter.

This forklift tractor is carrying a huge bale of hay.

8.

9.

This tractor is pulling a bale wrapper. It wraps silage and hay bales in plastic to protect them from wet weather.

Making light work

This farm loader has a large bucket to shovel heavy loads.

This wheel loader is moving sand at a quarry.

1.

This tractor has caterpillar track wheels to stop it from slipping on soft ground.

2.

Unscramble the words below to find 3 types of truck and write the names in the spaces. The trucks are all mentioned somewhere on these two pages.

litffkorf ckrtu

gbargae ktrcu

mpdu uckrt

This is a track excavator. It digs trenches for pipes, drains, and cables.

3.

4.

This is a dump truck. It moves soil and rubble around construction sites.

5.

This garbage truck has a specially designed trailer attached permanently to the cab.

This tractor is pulling a tanker of fuel for other farm machines.

8.

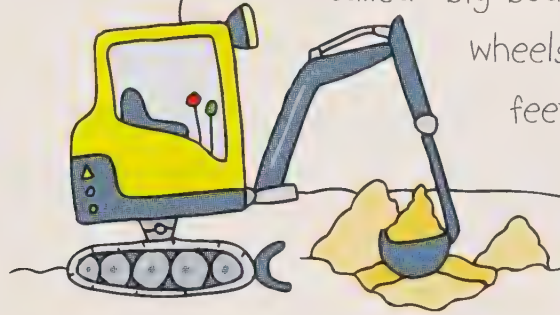

This tractor has a telescopic handler on a long, extendable arm to stack bales of hay.

9.

This backhoe loader has a double shovel at the front and a long arm with a tooth-edged bucket at the back for digging trenches.

Amazing fact

The world's largest tractor is called "Big Bud". Its back wheels are over 6 feet (2m) tall!

6.

This is a wheel loader. It is shifting earth on a construction site.

7.

Enormous trucks

Trucks transport large, heavy loads by road and on construction sites. Trucks with cranes lift objects high in the air. All trucks have a front part called a tractor unit containing the driver's cab.

Delivery trucks, cement mixers, and tankers are all varieties of truck.

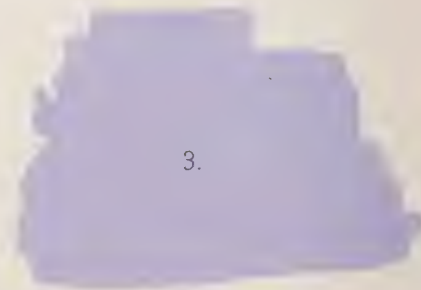

1.

This giant container transports everything from food to furniture.

2.

This low-loader is designed to carry very heavy or large loads.

3.

The low-loader attached to this truck is carrying a tractor.

Tractor and Truck Quiz

1. What does a giant container transport?

.....

2. What are low loaders used for?

.....

3. Where are mobile cranes used?

.....

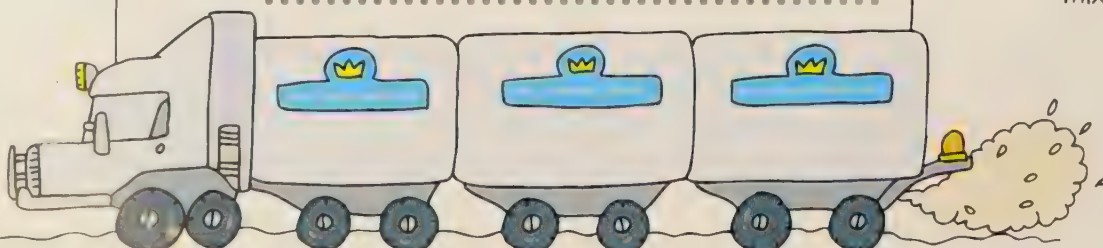

4. What are open body units used for?

.....

4.

This concrete mixer has a huge mixing drum to mix the concrete.

5.

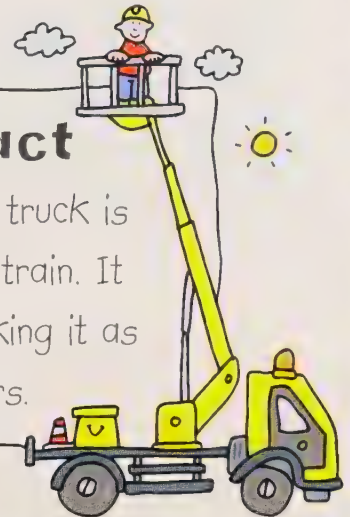

This is an articulated truck. Between the tractor and trailer unit there is an attachment which allows the truck to bend.

6.

On a logging truck, the logs and wheels are attached to each other to make the trailer.

Amazing fact

The world's longest truck is an Australian road train. It has six trailers, making it as long as 15 cars.

7.

This submarine rescue vehicle is being transported by a low-loader truck.

Road trains transport goods over very long distances in Australia.

8.

Mobile cranes are used on building and road construction sites.

9.

These trucks have open body units to pour small particles into. The side of the body unit flaps down to empty them out.

10.

Rescue trucks

This tow truck is picking up a car by sliding a long piece of steel, called an underlift, under it.

Whenever there is an emergency, we rely on rescue trucks.

They range from fire engines that put out fires, to tow trucks that remove damaged cars, to ambulances that rush sick or injured people to the hospital. Even the armed forces rely on trucks to move their vehicles around.

Fire engines have tall cranes to reach people high up in buildings.

1.

2.

3.

Ambulances have sirens and flashing lights to let other vehicles see them and move out of their way.

This army tank is being transported by truck to its new owner.

Read the sentences below and tick one of the boxes to say if they are true or false.

1. Ambulances have tall cranes to reach people high up in buildings.

T	F
☐	☐

2. Firefighters travel to emergencies in road sweepers.

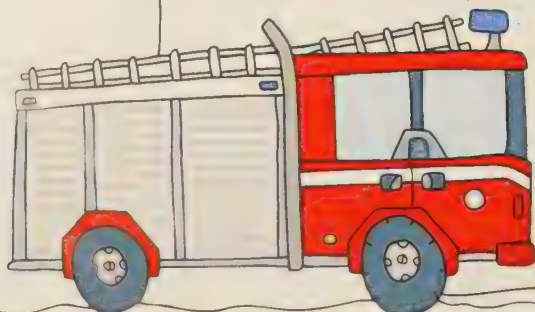

☐	☐
--------------------------	--------------------------

3. Two beds can fit in the back of an ambulances.

☐	☐
--------------------------	--------------------------

4. Fire engines have giant hoses for spraying water at vehicles that are in the way.

☐	☐
--------------------------	--------------------------

Firefighters travel to emergencies in the four-door cab.

Amazing fact

The most powerful tow truck in the world can pull the weight of two blue whales! It is called "Hulk".

5.

Even army vehicles break down. Their rescue trucks are specially designed to move the heavy vehicles.

6.

Ambulances are large enough to fit two beds in the back.

7.

Road sweepers help keep us healthy by removing litter and dirt from the streets.

All fire engines are equipped with giant hoses for spraying water to put out fires.

9.

This is an armored repair and recovery truck used by the British Army.

Coloring fun
